PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on experience in backend and full-stack development through two internships and deployed software projects. Proficient in Python, Java, JavaScript, React.js, Node.js, Spring Boot, REST APIs, MongoDB, SQL, AWS, and Docker. Strong foundation in Data Structures & Algorithms, OOP, API development, database optimization, and AI-enabled applications.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Backend : Node.js, Express.js, FastAPI, Spring Boot, REST APIs, OOP

Frontend: React.js, HTML5, CSS3

Databases & Cloud: MongoDB, MySQL, SQL, AWS, Docker

Tools & AI: Git, GitHub, LLMs, Generative AI, Agentic AI, RAG

EXPERIENCE

Java Backend Developer Intern · [Infosys Springboard](#) · Remote

Dec 2025 – Feb 2026

- Developed Java backend modules applying OOP, DSA, and clean-code practices within Agile sprint cycles.
- Used Git for version control, debugging, code maintenance, and peer code reviews.

Java Full-Stack Developer Intern · [FemtoSoft Technologies](#) · Chennai

Jul – Aug 2025

- Developed TaskFlow, an enterprise project management system using Java, Spring Boot, React.js, REST APIs, and MySQL.
- Implemented backend services and React.js workflows for project, task, and user management using a layered full-stack architecture.
- Implemented JWT-based authentication, role-based access control (RBAC), and database-driven workflows for secure project management.

PROJECTS

Life Flow — Smart Emergency Blood Donor Finder — [React.js](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [REST APIs](#) | [Live](#)

- Built and deployed a full-stack emergency donor-matching platform using React.js, Node.js, Express.js, and MongoDB for real-time donor discovery; optimized aggregation and indexing, reducing query time by ~35%.
- Implemented structured error handling and request validation to improve backend reliability for time-sensitive donor-matching workflows.

MyJarvis — Agentic AI Assistant Platform — [Node.js](#) · [JavaScript](#) · [REST APIs](#) · [Agentic AI](#) · [LLMs](#) | [Live](#)

- Built a Node.js backend using routes, controllers, services, and middleware to integrate Agentic AI for task automation.
- Implemented REST APIs with input validation, centralized error handling, and structured JSON responses.

Diet Agent — AI Recommendation Engine — [React.js](#) · [Node.js](#) · [Express.js](#) · [REST APIs](#) · [Generative AI](#) | [Live](#)

- Built an AI-powered nutrition platform with a modular controller-service backend for personalized recommendations.
- Implemented REST APIs with sub-200ms response latency and deployed the full-stack application on Render.

EDUCATION

B.E. Computer Science Engineering — **Mohamed Sathak Engineering College, Tamil Nadu** | **2022–2026**

CERTIFICATIONS

- Microsoft : Foundations of Coding – Full-Stack — Jun 2026
- Google × Kaggle: AI Agents Intensive
- Walmart: Advanced Software Engineering Simulation (Data Structures & Algorithms, System Design, Database Design)
- Infosys: GPT-3 for Developers & Java
- GUVI & HCL: AWS Fundamentals; Python Zero to Hero (ISO-Certified)
